THE DIPPING SEASON.

Under the above heading, the following appears in recent exchange:—

"Speaking of Dips themselves, perhaps the most significant feature in the history is the way that the Old-fashioned have been superseded by the more Modern and Scientific preparations. As Powders gave place to the various 'Fluids' and these again to the 'Powders' so we find to-day these latter retiring before the new Dips. Of the many recent experiments we have witnessed in England and the Colonies, the most successful were with an Arsenical Paste, manufactured by Tomlinson and Hayward, of Lincoln, a firm that has always been noted for keeping abreast of the times."

"The advantages of the Paste over the 'Powders' are many:—
"It does not make the wool dry and harsh, but leaves it soft and silky, giving a healthy sweet smell to the sheep. Being, so to speak, already mixed, it is easier to prepare there, being no waste in sowing 'powders,' so fly-about.
"As it is prepared with Glycerine it is lighter than the 'Powders' and does not so readily settle to the bottom, and in the same reason it is not injurious to the hands. It goes in less space and is more concentrated, than the 'Powders,' thus effecting an economy in transport and labour. It costs less, and will mix with any kind of water. In a word, it is the 'Powders' discarded of their many inherent defects, with their curative properties and great qualities preserved and increased. Until the manufacturers make some better discovery."

"HAYWARD'S PASTE DIP"

IS

"THE DIP OF THE CENTURY."

Sold in cases to make 500 and 1,000 English gallons
Samples will be forwarded gratis to any part of the Empire, and if desired, the entire undertaking by practical dippers, free of charge.
